Soft Skills

- Project Management Skills.
- Critical Thinking & Analytical Skills
- Communication Skills
- Presentation Skills
- Team Work

Profile

I am a final-year BSc. (Hons) Software Engineering student who is passionate about lifelong learning and who is committed to staying current with technology.

I'm seeking a position doing Project Manager as an intern to utilize my knowledge and talents to gain real-world experience and help the company succeed. I think I have the technical and soft skills required to succeed as a Project Manager, with good communication skills and a deep interest in web application development. I am excited to work with seasoned experts and gain their knowledge.

Projects

RFID Based Library System (2021)

- This is an application which is used to store library records automatically. This is a RFID based system with **Java and MySQL**. There are two parts of the system which are one for librarians and one for students.

Smart Grocery System (2022)

- A smart grocery system which is most useful for cashiers. Fully implemented with **Java and MySQL**

EventsWave (2023)

- This is a social media application built using PHP, it allows University Clubs and organizations to create profiles, connect with friends, upload posts, events, and interact with a community of users. Implemented with **PHP,MySQL,JavaScript,Bootstrap,CSS,HTML**. This was a group project and I contributed to this project by creating **dashboard** site.

Friendlance (On going)

- A social media website which similar to Facebook. Implementing by using **PHP,HTML,CSS and MySQL**.

Student Monitoring System for SLTC Research University (On going)

- This will be our final year project. Will be a web application that can store all the educational and special data of university students from the 1st semester to the 8th semester. Also, the university will be able to monitor students through this platform. Will use **PHP, JavaScript** to implement this web application.
